

GitHub - Setup

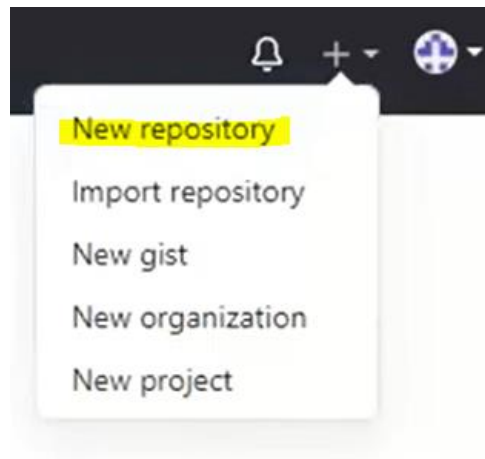

Version control system

1. Account Create / Login

The image shows the GitHub login page. At the top is the GitHub logo (Octocat). Below it is the text "Sign in to GitHub". The login form consists of two input fields: "Username or email address" and "Password". To the right of the password field is a link "Forgot password?". Below the input fields is a green "Sign in" button. At the bottom of the form is a link "New to GitHub? Create an account."

2. New Repository

CREATE A REPOSITORY

- Storage space for your project
- GitHub is a very popular central repository that allows you to share your files
- Push your local repo into GitHub and share it with other collaborators via the central repo

Owner *

Repository name *

Edureka ✓

Great repository names are short and memorable. Need inspiration? How about `psychic-goggles`?

Description (optional)

This is first repository

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ **Add a README file**

This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**

Choose which files not to track from a list of templates. [Learn more.](#)

☐ **Choose a license**

A license tells others what they can and can't do with your code. [Learn more.](#)

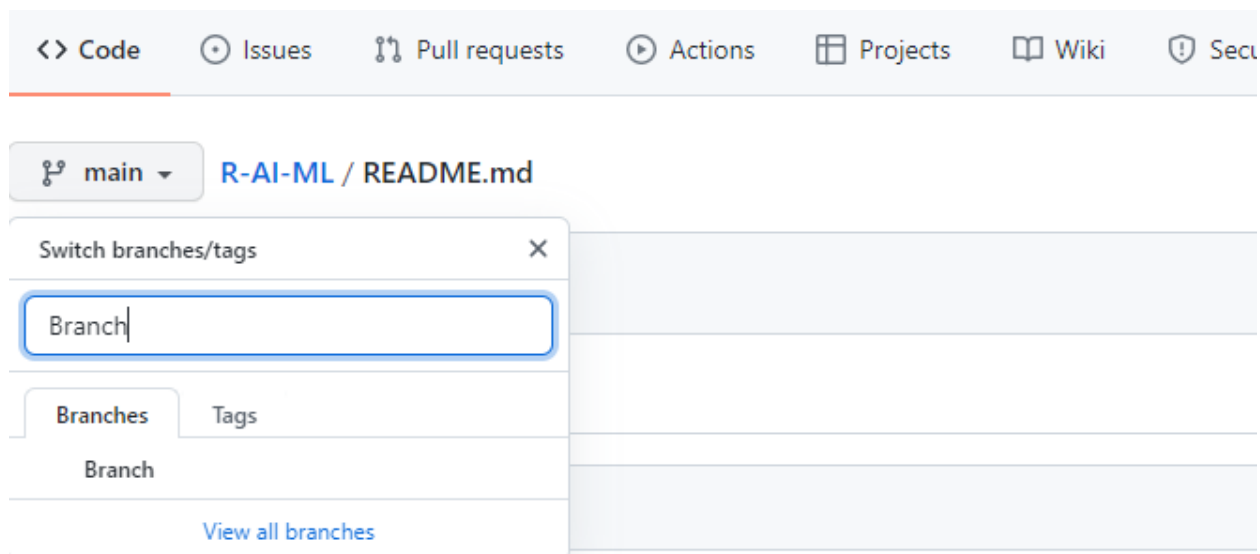

Create repository

3. Create a Branch

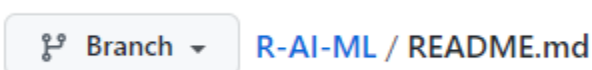

CREATE A BRANCH

- Branches allow you to work on other features
- They can be included with the main line of your project
- The main branch — the one where all changes eventually get merged back into, and is called master

Created branch

4. Make a Commit

MAKE A COMMIT

- Records changes to one or more files in your branch
- Git assigns each commit a unique ID, called a SHA or hash, that identifies: The specific changes

Branch [R-AI-ML](#) / README.md [Go to file](#) [...](#)

R programming language

Click on the pencil to go into edit mode and add any changes. As show in below figure.

Attach files by dragging & dropping, selecting or pasting them.

Commit changes

Update README.md

Add an optional extended description...

- ☒ Commit directly to the **Branch** branch.
- ☐ Create a new branch for this commit and start a pull request. [Learn more about pull requests.](#)

Commit changes

Cancel

By commit change your changes will be save into Branch. Your can add comments to know what changes your making.

Note: If you switch to main branch the changes are not implemented to my master branch.

Now to view the HISTORY of changes made, click on History in your Branch.
